E-mail jameelalgharabat@gmail.com

I am a Software engineer and open source contributor, I have keen interest in building useable products, and to do so, I have one eye on the code and the other on the product!

Technical Profile

- I can build full functional web applications using PHP Laravel, MySQL, React.js
- I can use and collaborate with other team members via Git and GitHub.
- Front end development from images, Figma files, or other tools as it requires. I
- can deploy web applications on the cloud, practice some CI/CD skills such as push to deploy and GitHub pipelines.
- I love open source and I think it is one of the awesome things in the industry, so I published 4 open source projects and my aim is to gain good experience to start contributing to other active projects.
- I have a full ownership of the given task, I take it end-to-end and love to wear the product hat to build awesome tools.

Work History

2022-06 - 2023-01

Software Engineer Trainee

Orange, Amman

- I can build backend systems using PHP Laravel, Pure PHP, MySQL, I am also able to collaborate with other backend developers via version control systems such as Github
- I can build front end interfaces from images, figma designs, or any other prototyping tools using HTML, CSS, JavaScript, React.js
- Built +10 projects (backend and frontend using PHP mainly), I also open sourced 4 of them on GitHub and I am actively maintaining them on weekly basis.
- Shadowed team members to learn new tasks and how to appropriately handle technical issues.
- I am a hand on engineer and learner, during my time in Orange i learned a lot just by observing others and asking the right questions.
